

Barrel Clamp

Barrel Clamps - A Barrel Clamp is actually a mechanical or hydraulic accessory intended for a lift truck. It can be utilized so as to squeeze the object you want to transport using the lift truck and is typically used for handling paper rolls, barrels, and kegs. Several designs of barrel clamp attachments likewise have a rotate function. Like for instance, the revolving function allows a forklift operator to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
