

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental organization which comprises of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States partner, Doosan Infracore America Corporation, based in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer requirements.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. What's more, there are more than 90 independent dealers moving lift truck equipment and materials handling equipment. This system allows Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably includes 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle versions vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift and lift truck corporation in the North American market, due to its excellent level of product performance and their consistently high level of customer support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division located in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a nationwide equipment expansion venture. Early sales of this industrial equipment focused on large business groups, the armed services and on state-run companies. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a position of significant expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to respond to competitive pressures in the US materials handling industry. This venture greatly expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a modern plant which helped set up the company for the fabrication of high added-value products suited for export. In 1993, the corporation had a international sales system and started exporting models they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
