

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

Whilst on their trip, John spent time talking to former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a substantial market for a product that could promptly and securely lift individuals in the air to accomplish maintenance and other construction functions.

Upon returning from their travels, John formed a joint venture with two friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they built and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into existing versions.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into different markets worldwide and develops new products to ensure customers are capable of being more effective and perform in the workplace within a safer environment.
